TURN ON SPECIAL HARVEST UNIT FOR INDIVIDUAL CROPS: .....	1
DEFINE THE 'SPECIAL HARVEST UNIT': .....	2
<b>DATA ENTRY EXAMPLE</b> .....	3

### Introduction

Special Harvest Units allow any crop to be harvested in any unit.

For example: Broccoli Crop

In this instance we will create a special harvest unit called 'Head' which will be of the harvest unit 'Each', this will allow us to harvest the broccoli crop by the head and not by any predefined unit (e.g. Kilograms).

### Activation & Configuration

#### **Turn on Special Harvest Unit for individual crops:**

Configuration -> Crop Types & Associated Lists & Settings

Double click on the crop from the list, in the 'Crop Maintenance' dialog ensure that you have 'Use Special Harvest Units' selected.

The type of harvest unit is important, in this instance we have selected 'Each'.

The screenshot shows a software dialog box titled "Add a Crop" with a close button (X) in the top right corner. The main area is titled "Crop Maintenance" and contains several input fields and a checkbox:

- Crop Type:** A dropdown menu set to "Vegetable".
- Crop Name:** A text box containing "Broccoli".
- Short Name:** A text box containing "BRO".
- Planting Units:** A dropdown menu set to "Kilograms" followed by "per" and a text box containing "Hectares".
- Harvest Units:** A dropdown menu set to "Each" followed by "per" and a text box containing "Hectares".
- Use Special Harvest Units?:** A checkbox that is checked.

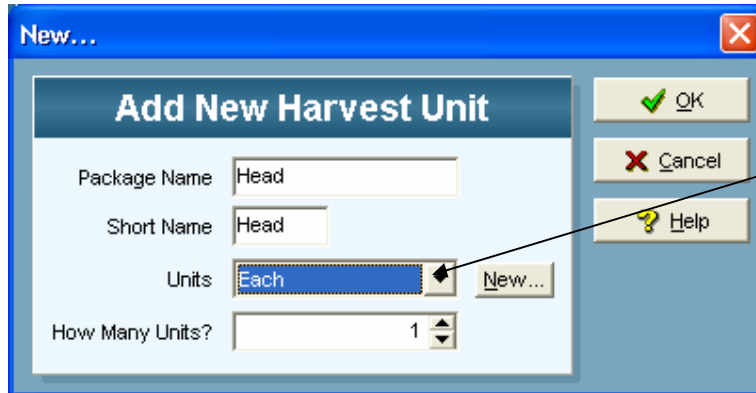

On the right side of the dialog, there are three buttons: "OK" (with a green checkmark icon), "Cancel" (with a red X icon), and "Help".

**Define the 'Special Harvest Unit':**

Configuration -> Units of Measure & Package Sizes -> Special Harvest Units tab

Once in the 'Units of Measure' screen with the Special Harvest Units tab selected, select the

 button to achieve the 'Add New Harvest Unit' screen.

This unit MUST be the same as the Harvest Units selected in the Crop Maintenance setup.

Enter details for your Special Harvest Unit as shown above.

**NB:** The field 'Units' & 'How Many Units?' gives PAM the quantity of the Harvest unit, for example, if this Special Harvest Unit was in fact a carton of Broccoli heads then the information in this screen would be as follows:

**Package Name:** Carton

**Short Name:** Carton

**Units:** Each

**How Many Units?:** 12

The Units selection MUST be the same as the Harvested Units selected in the Crop Maintenance Setup.

Our Special Harvest units would then allow us to harvest so many 'Cartons', but allow us to have financial information on the individual Broccoli head harvested.

**Data Entry Example**

Once the configurations have been done for the Crop and the Special Harvest Unit then during the Harvest Operation your Special Harvest Unit will appear.

Harvest Delivery												
Class or Grade	Load ID	Delivered to...	Harvest Units	Total Units	Monitoring	Base Price	Discounts (\$/Unit)	Premiums (\$/Unit)	Total Value	Net Price (\$/Unit)	Net Price
